

# C.C. PRESPRAY

## CARPET PRESPRAY TREATMENT

- **C.C. PRESPRAY** is water based, non solvent, non caustic detergent that emulsifies grease, oil, wax deposits making extraction cleaning easier and quicker.
- **C.C. PRESPRAY** is formulated for the rapid break down and removal of heavy encrustation and soilage from carpets and fabric upholstery prior to steam or extraction cleaning.
- Prespraying greatly assists the extraction effectiveness by chemically breaking down the encrusted surfaces often found in heavy traffic areas, particularly hotel bars and high spillage areas.
- By breaking down the soilage with **C.C. PRESPRAY** prior to extraction ensures that you will clean the area with one sweep instead of repeatedly going over the same area, which can lead to overwetting of the carpet and resultant shrinkage.

### APPLICATION

**C.C. PRESPRAY** can be used as a spotter, traffic lane prespray or used to clean the entire carpet area. **C.C. PRESPRAY** should be applied through a mist sprayer, manual mist pump or electrical sprayer.

The recommended dilution rate is up to 8 parts water depending upon the build up and type of soilage to be removed. Apply by mist sprayer, allow contact time and extract as per normal.

**NOTE:** Always use C.C. Antifoam as **C.C. PRESPRAY** foams slightly.

### WARNING

Avoid Eye Contact

### FIRST AID

If poisoning occurs contact a doctor or Poisons Information Centre. PH 13 11 26. If swallowed do not induce vomiting, give a glass of water and seek medical advice. If skin contact does occur remove contaminated clothing and wash thoroughly with water. For eye contact, irrigate with water for 15 minutes. If irritation persists seek medical advice.

### PACKAGING

**C.C. PRESPRAY** is available in 5, 15 and 25 litre containers.
